DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6, 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Tanaka et al (PCT WO 2004/066131).

Regarding claims 1-6, 19 Tanaka et al disclose a computer accessory comprising: an auxiliary battery 13; and a port replicator 35, 36; the auxiliary battery 13 and the port replicator 35, 36 integrated into a single unit the computer accessory configured for portable operation with a computer. A computer accessory, comprising: a docking connector 35; a battery 13; at least one communication port 36; a connection from the docking connector 35 to the battery 13; and a connection from the docking connector 35 to the communication port 36; the battery 13 powering a computer connected to the docking connector 35 wherein the docking connector 35 is configured to engage a mating connector on the computer; a housing 35 configured to attach to the

Art Unit: 2835

computer; at least one hook feature, 37 configured to engage a receiving feature 23 on the portable computer.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bovio et al (US 2002/0181199) in view of Clark et al (US Pat. 5,859,762).

Regarding claims 1-20 Bovio et al disclose a computer accessory comprising: an auxiliary battery 124; and a port replicator 100, the auxiliary battery 124 and the port replicator 100 integrated into a single unit. A computer accessory, comprising: a docking connector 110; a battery 124; at least one communication port 14; a connection from the docking connector 110 to the battery 124; and a connection from the docking connector 110 to the communication port 14; the battery 124 powering a computer connected to the docking connector 110 wherein the docking connector 110 is configured to engage a mating connector on the computer; a housing 100 configured to attach to the computer wherein the computer accessory is configured to attach to the bottom of the computer; at least one hook feature 132, 134, configured to engage a receiving feature on the portable computer; a releasing mechanism 168, 170 which,

Art Unit: 2835

when actuated, disengages computer accessory from the computer wherein the computer accessory can be attached to and detached from the computer without the use of tools wherein the docking connector connects to the computer through a cable; a receptacle 146 for accepting power from an external power source wherein the external power source is a source of mains power wherein the power received from the external source can be used to recharge the battery wherein the at least one communication port includes at least one Universal Serial Bus port.

Bovio et al fail to disclose the computer accessory configured for portable operation with a computer. However Clark et al disclose the computer accessory configured for portable operation with a computer (see column 3, lines 24-32). Therefore, it would be obvious to one of ordinary skill in the art to modify the computer accessory configured for portable operation with a computer of Clark et al into Bovio et al's computer accessory in order to be convenient in operation the computer system.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2835

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
